## Planview and Cross Section of:

Structures (such as buildings, piers, towers and headwalls)

Drainage and flood control facilities, including culverts and open channels (with inverts), dams and dikes

Subsurface sewage disposal systems & underground utilities

Filling, dradging and excavating, Indicating volume and composition of material

Cempensalory storage areas, where required in accordance with Part III, Section 10:57 (a) of the regulations

Wildlife habital restoration or replication areas Other

Point Source Discharge

Description of characteristics of discharge from point source (both closed and open channel), when point of discharge falls within resource area checked under Part I, item 11 above, as supported by standard engineering calculations, data and plans, including but not limited to the following:

- 1. Delineation of the drainage area contributing to the point of discharge;
- 2. Pre- and post-development peak run-off from the drainage area, at the point of discharge, for at least the 10-year and 100-year frequency storm;
- 3. Pre- and post-development rate of infiltration contributing to the resource area checked under Part I, item 11 above:
- 4. Estimated water quality characteristics of pre- and post-development run-off at the point of discharge.

## Part IV: Milligating Measures

- 1. Clearly, completely and accurately describe, with reference to supporting plans and calculations where necessary:
  - (a) All measures and designs proposed to meet the performance standards set forth under each resource area specified in Part III of the regulations; or
  - (b) why the presumptions set forth under each resource area specified in Part II or Part III of the regula-

☐ Constal Resource Area Type: ☐ Inland ☐ BHFFER ZONE	identifying number or letter of support documents
Construction of house and portion of septic system within the buffer zone of a wetland. The fill area near the dwelling will be loamed and seeded as soon as practible.  Hay bale erosion and sedimentation controls check will be placed to protect from possible sedimentation prolems.	A

## Part V: Additional Information for a Department of the Army Permit

1. COE Application No. \_\_\_\_\_\_\_\_ 2. (Name of waterway)

3. Names and addresses of property owners adjoining your property:

- 4. Document other project alternatives (i.e., other locations and/or construction methods, particularly those that would eliminate the discharge of dredged or fill material into waters or wetlands).
- 5. 81/4" x 11" drawings in planylow and cross-section, showing the resource area and the proposed activity within the resource area. Drawings must be to scale and should be clear enough for photocopying.

Certification is required from the Division of Water Pollution Control before the Federal permit can be issued. Certification may be obtained by contacting the Division of Water Pollution Control, 1 Winter Street, Boston, Massachusetts 02108.

Where the activity will take place within the area under the Massachusetts approved Coastal Zone Management Program, the applicant certifies that his proposed activity compiles with and will be conducted in a manner that is consistent with the approved program.

Information provided will be used in evaluating the application for a permit and is made a matter of public record through issuance of a public notice. Disclosure of this information is voluntary, however, if necessary information is not provided, the application cannot be processed nor can a permit be issued.

Thereby certify under the pains and penalties of perjury that the foregoing Notice of Intent and accompanying plans, documents and supporting data are true and complete, to the best of my knowledge.
